*DIGITAL ONE-TO-ONE APPROACH

« Two-sided markets are economics platforms having two distinct user groups that provide each other with network benefits. »

➢ Necessity to develop a **« one-to-one » approach.**

Digitalization allows information of all formats to be crossed and carried with the same efficiency.

Traditional 4P's Model → **5I's model**

OUR FAIR AND TARGET

koelnmesse
we energize your business | since 1924

- Founded in 1924
- Every year it organizes more than 80 trade fairs and guest events in Cologne and in the world's most important markets
- One of the market leaders in job fairs organization in Germany
- They have been developing different digitalized solutions (e.g Matchmaking 365)

- Graduated students
- From all over the world
- Being aged no more than 30 years

- Companies looking for potential employees

JOB FAIRS BENCHMARK	Identification (data collection)	Individualization	Interaction	Integration
SID Washington Traide Fair	• **Registration** (ID, background, contact) • **Wifi Access** (phone, mail)	• **Search Bar** to select firms	• **Social Media** • **Speakers**	• **Survey** (thoughts about the event) • **Network and workgroups** • **Membership**, creating networking oppportunities
Texas University	• Registration • Wifi Access	• **Filters** • **Favorites**	• Social Media • **F.A.Q**	• Survey (thoughts about the event)
Colombus State University	• Registration • Wifi Access	• Search Bar	• Social Media	• Survey • **Student resources**
Global Careers Fair (only online event)	• **Profile creation**	• **Job suggestions** (regarding the profile)	• Social Media • **Chat** • **Newsletters** • **Virtual Events**	• Student resources
***The Job Fairs* (Job Fairs organizer, leader in UK)**	• Profile creation • Wifi Access	• Job suggestions	• Social Media • F.A.Q	
Kölnmesse	• **Leadtracking tool (for employers)** • **Registration** • **QR Code (data collection)** • Wifi Access	• Filters • Job suggestions • **Meetings schedules**	• **Inquiry** • Speakers	• **Accompanying program services** • **Meetings schedules** • **Application photo service**

RESEARCH PHASE

Qualitative interviews

- 1 Expert interview
- 2 «Potential visitors» interviews
- 2 «Potential exhibitors» interviews

To get useful insights to build our online survey and understand expectations of potential visitors

***Online survey (Visitors)**

- 79 respondents
- Topics
  - Social networks usage
  - Used means to look for a job
  - Job Fairs: knowledge of the format, key motivations
  - Evaluation of our first proposals
  - Demographical data

- Bivariate analysis, Factor & Cluster analysis

To understand our target customers and test our core ideas

*Details in the Appendix

STUDENTS INTERVIEWS - INSIGHTS

Functions of a job fair

„I get in contact with new contacts and unknown to me firms“

„Job fair helps me to make first step towards professional world“

Significant job criteria

„Study related tasks if it‘s an internship or trainee position“

„Location. The bigger the city, the higher you get paid!“

Digitalization approach

„I‘m not really familiar with digitalization approach connected to personalization, but it can be useful for people who are at the very beginning of their career who have got problems to find a job“

EMPLOYERS INTERVIEWS - INSIGHTS

Functions of a job fair

„Job fair help us to get an overview of the student employment market“

„Such event is part of our market research including competition research “

Significant job criteria

„Loyalty and strong will, so not switching jobs too often!“

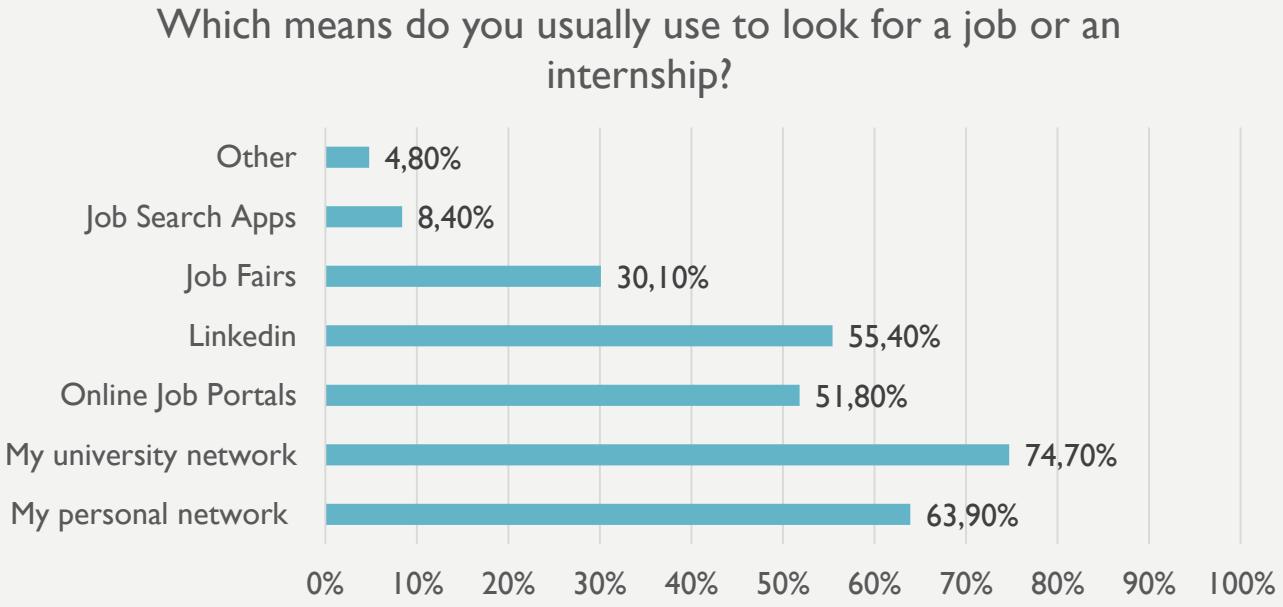

„Work experience & career path at its best!“

Digitalization approach

„A service like that is a threat to headhunters who recruit students and young graduates“

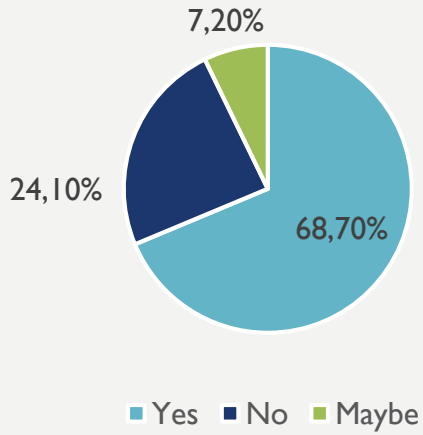

„Digitalization can‘t reflect the employer‘s and student‘s real expectation when dealing with job positions, so why shall we pay?“

SURVEY INSIGHTS: JOB FAIRS

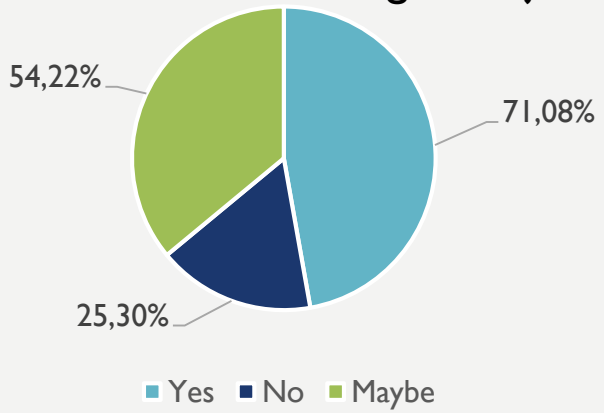

- Job Fairs is not perceived as a mean to be used to look for a job: the most part of people use their own networks, online job portals, and Linkedin.
- People who have already been to a job fair think that it is useful to this purpose

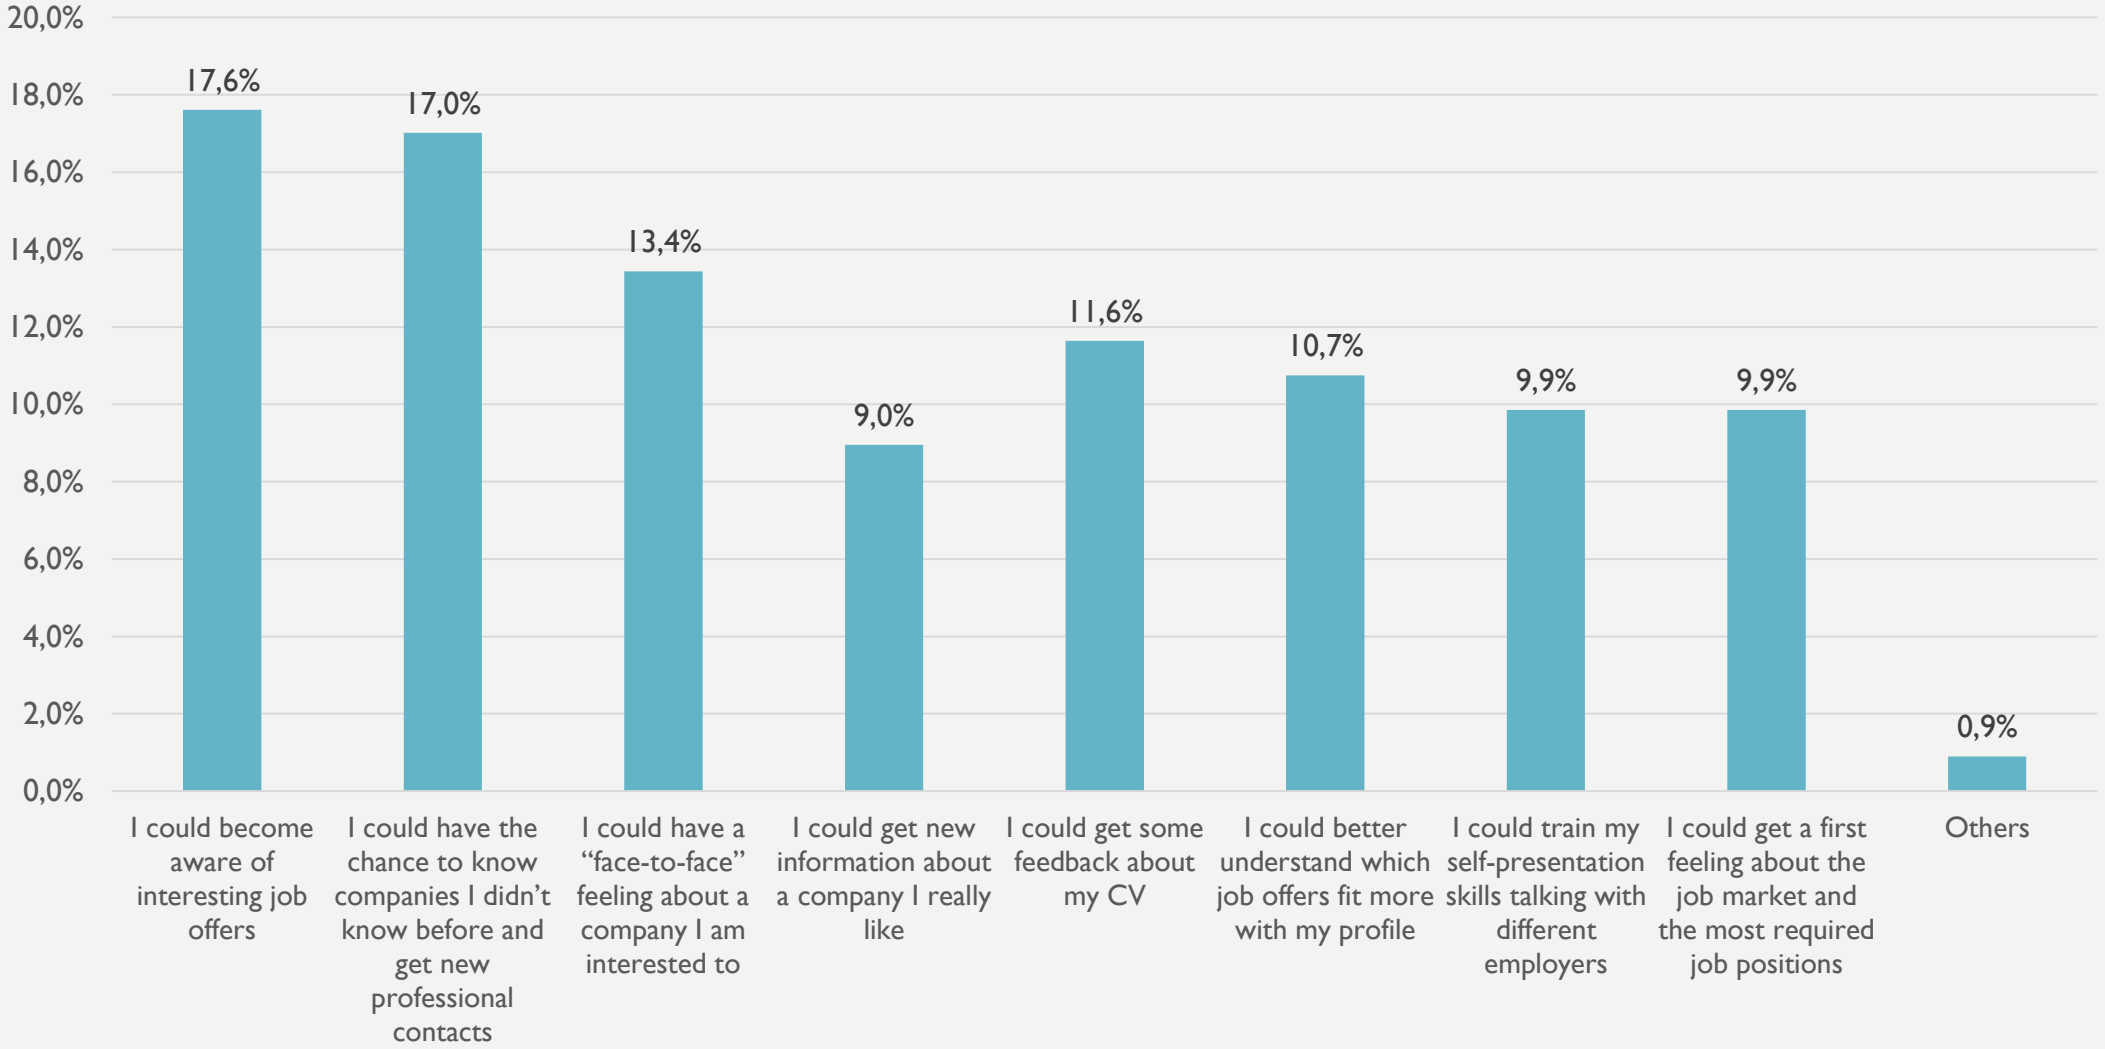

Do you know what is a Job Fair?

Do you think that a job fair could be useful to a student who is looking for a job?

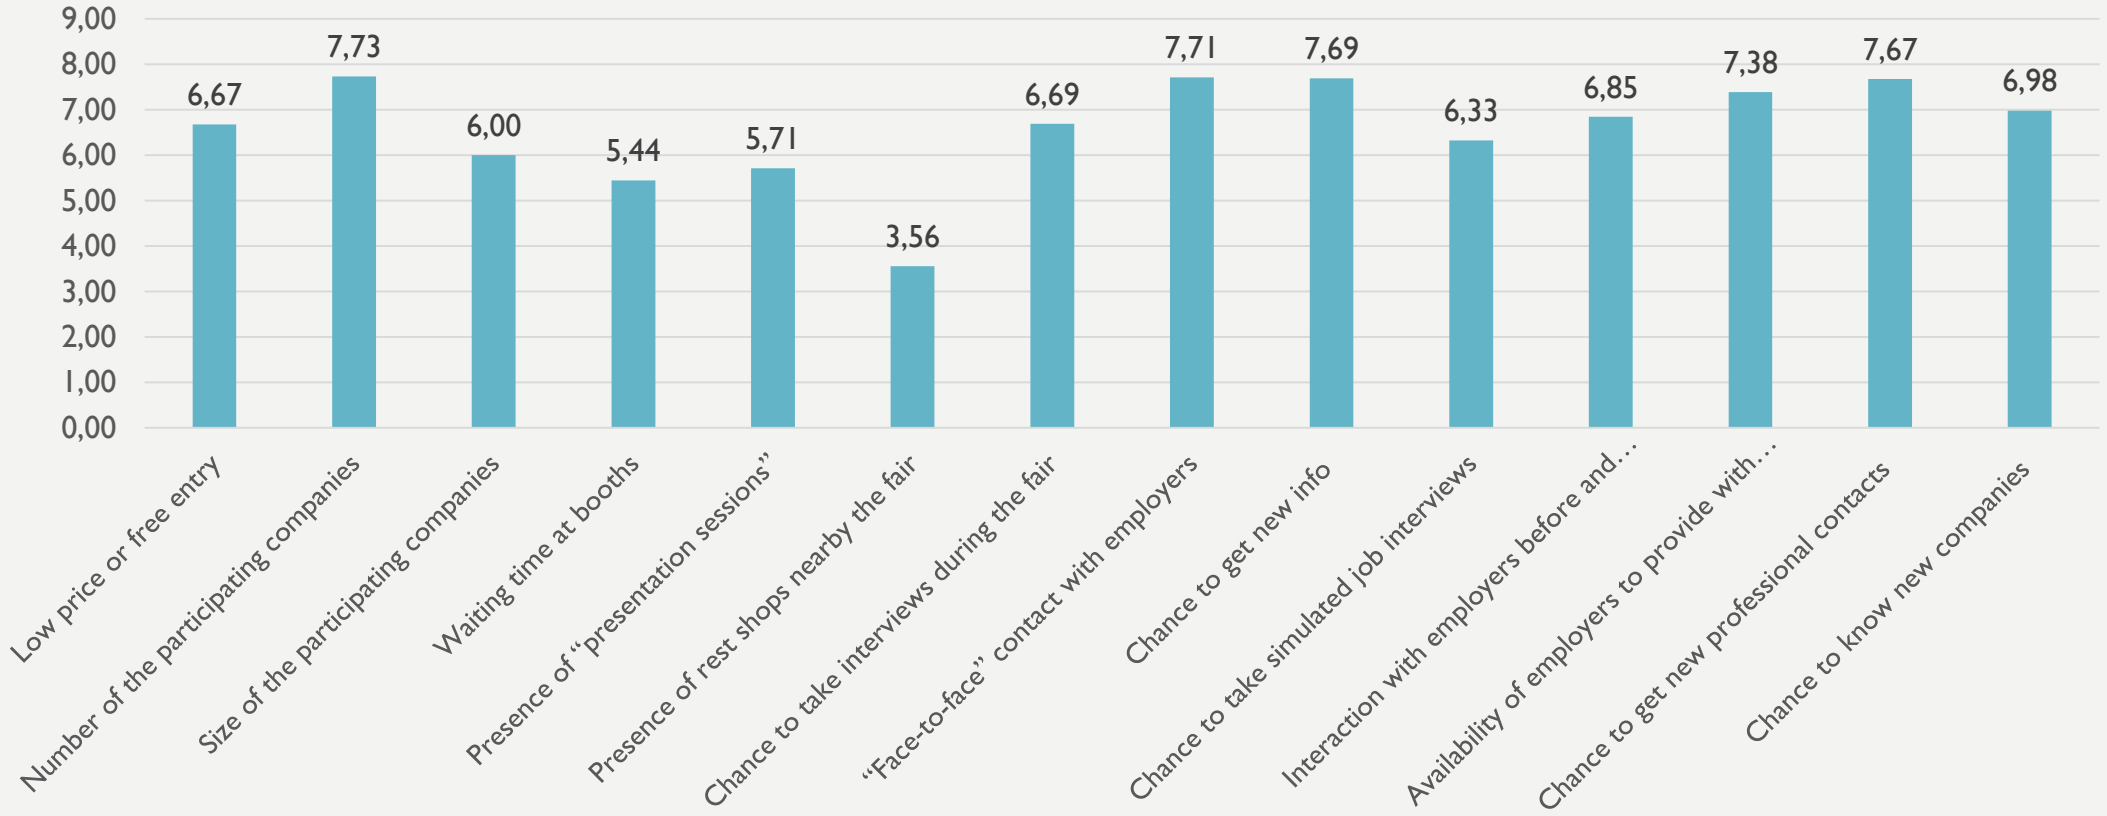

WHY IT COULD BE USEFUL?

WHICH ARE THE MOST IMPORTANT NEEDS OF VISITORS?

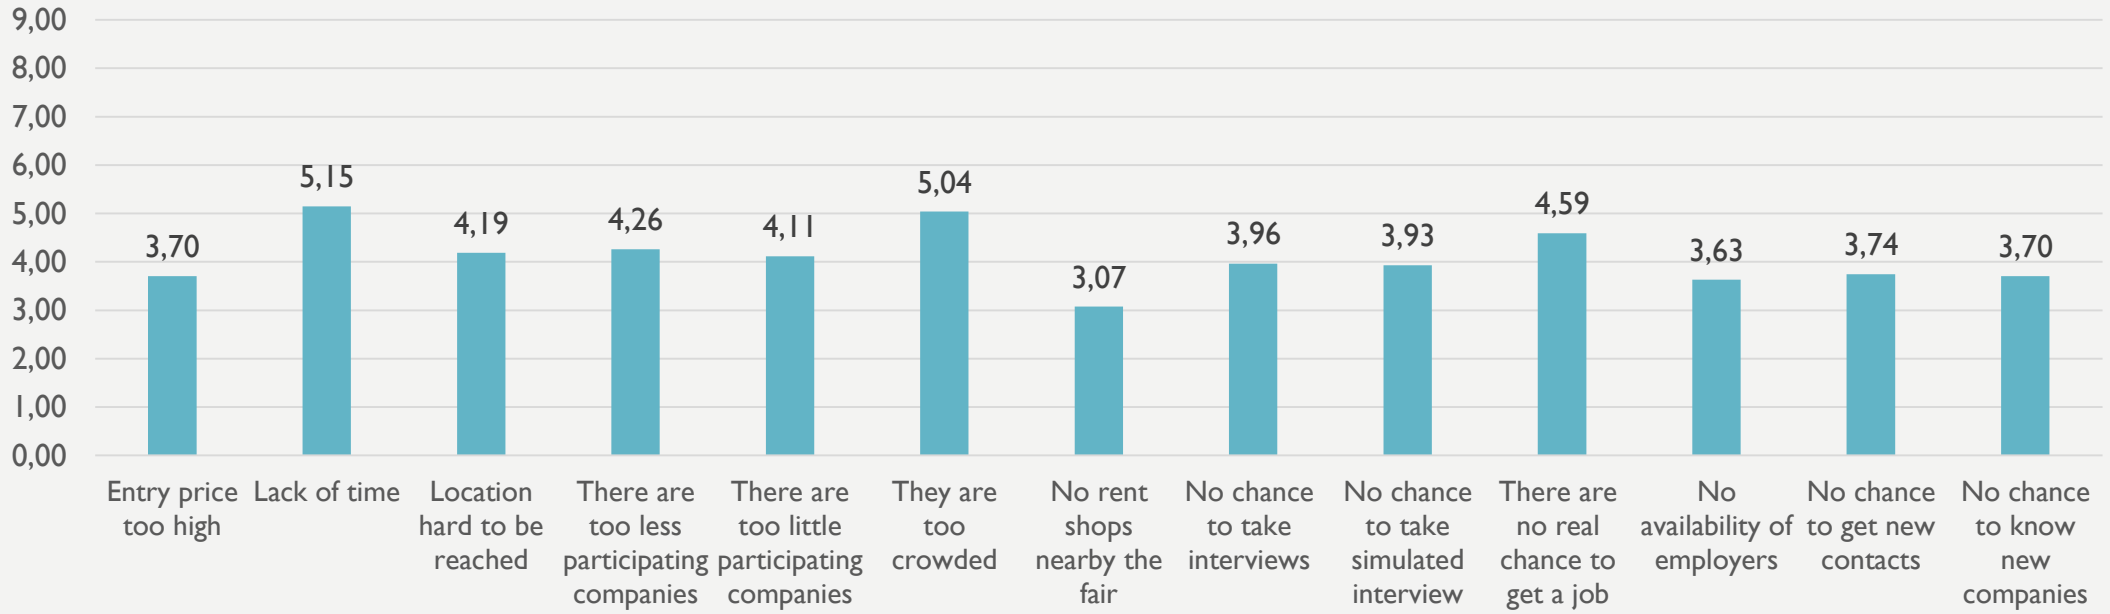

*Average score in a range from 1 to 9

A good number of participating companies, the chance to have a **«Face-to-face» contact** with employers and the chance to get **new information** were found to be the most important services visitors are interested in when they go to a job fair.

WHY DON'T YOU COME TO OUR EVENT?

*Average score in a range from 1 to 9

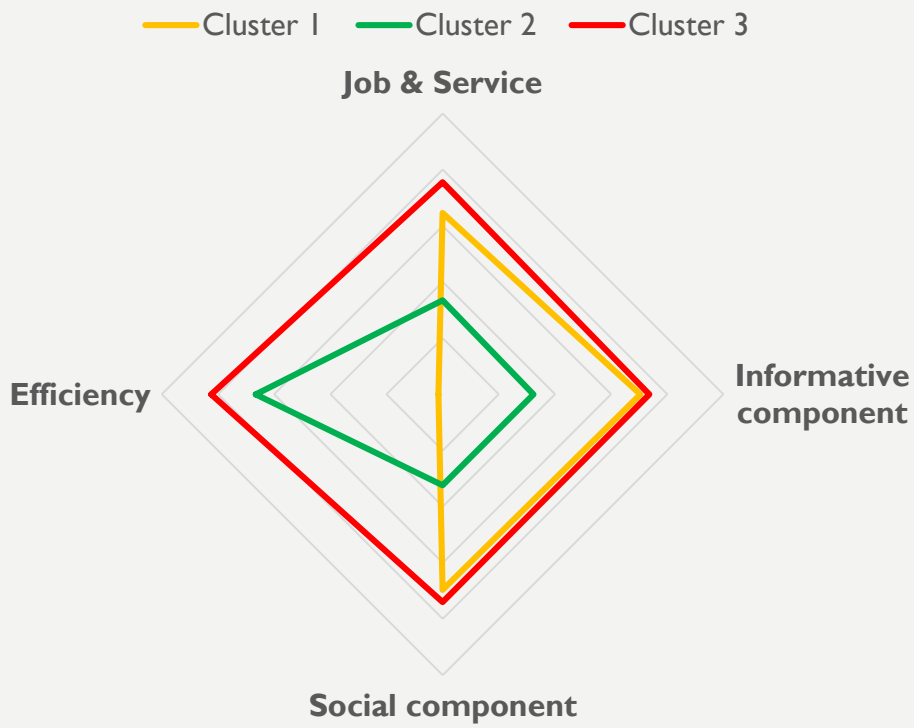

- The most important hampering factors for people who have never been to a Job Fair were found to be **the lack of time**, the fact that they are **too crowded** and apparent **no real chance to get a job**
- As a consequence, we think that a digital approach applied to a Job Fair should especially improve the **efficiency** of the event and provide with services that could **better match visitors and employers expectations** about job offers

FACTOR ANALYSIS

- We analyzed the results of the question ”How much these factors are important for you in choosing to go to a Job Fair?” through the statistical software SPSS
- We launched a **Factor Analysis** to summarize in 4 components the most important attributes in choosing to go to a Job Fair
- Afterwards, we used the 4 drivers of choice to launch a **Cluster analysis** in order to **segment our sample** and try to understand on which segment we should focus

Size of the participating companies	«JOB & SERVICE»
Chance to take interviews during the event	
Chance to take simulated interview	
Presence of rest shops nearby the fair	
Interaction with employers	
«Presentation» sessions	INFORMATIVE COMPONENT OF THE RELATIONSHIP
Chance to get new information	
Chance to know new companies	
Number of participating companies	SOCIAL COMPONENT OF THE RELATIONSHIP
Chance to get new professional contacts	
«Face to Face» contact	
Availability of recruiters to provide with info	
Low entry price	EFFICIENCY
Waiting time at booths	

CLUSTER ANALYSIS

The Networkers (21,5%)

- ✓ Social component (to get new contacts, to have a «face to face» contact etc.)
- ✓ To get new info and know new companies

«I don't care» (31,4%)

- ✓ Essentially indifferent, but they care more about efficiency

The Involved (47%)

- ✓ «Job & Service» component (to take interviews, to have an interaction with recruiters etc.)
- ✓ Efficiency
- ✓ To get new info and know new companies

OUR VALUE PROPOSITION

- Our core idea is to realize a centralized and automatized **digital platform (APP** for smartphone) which makes all the customer journey more efficient, cheap and personalized (***Continuity personalization strategy)**
- The primary goal of this platform would be to guarantee a better matching between visitors and exhibitors expectations
- In addition, **some digitalized services** will be used to improve the experience of the fair
- Each strategy refers to the «5 I's» Dawn model

*Dawn, S.K. (2014). Personalised Marketing: Concepts and Framework, Productivity, 54 (4), 370-377

*OUR 3 MILESTONES

1. Cheap

- Students and graduates are under **financial constraints**
- Possible solution: students or hiring employers pay for service **only if they get the job**

2. Flawless

- **Flexible** and **resistant operating process**
- Visitors and exhibitors can interact without having a face-to-face contact
- **Orientation test** uploaded in advance by the employer to get a **first impression** of the visitor and view on his true profile

3. Secure

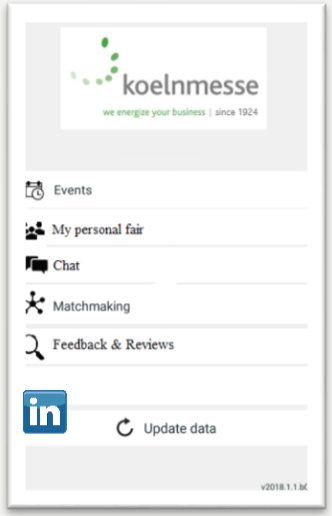

- **GDPR** (General Data Protection Regulation): new set of rules designed to give EU citizens more control over their personal data
- **Implications** for Job Fairs: → get authorization to use data and involve a security authorized agent
- **Visitors rights**: →transfer and delete their data

- Elaborated by analysing «Holland, H. & Koch, B. (2014). Mobile Marketing. In: Holland, H. (ed.). *Digitales Dialogmarketing* (pp. 431-458), Springer: Heidelberg

CUSTOMER JOURNEY : PRIOR THE EVENT

Bob, young graduated student in Digital Marketing, is looking for a job.

LinkedIn Profile upload
+ Orientation Test on Kölnmesse app

Consultation of job offers.
Swipe right=interested
Swipe left=not interested

There's a **match** !
Bob chat with recruiters he matched with in order to get more information about job offers.

CHAT SERVICE

INTERACTION

- A **chat service** would be integrated in the app

- Potential visitors would have the possibility to chat with employers and job organizer to:
  - **get clarifications** about the fair and the available job offers
  - **schedule** meeting and/or interviews

- The actual MatchMaking365 layout would be mantained to provide visitors with the possibility to send questions to companies without using the chat

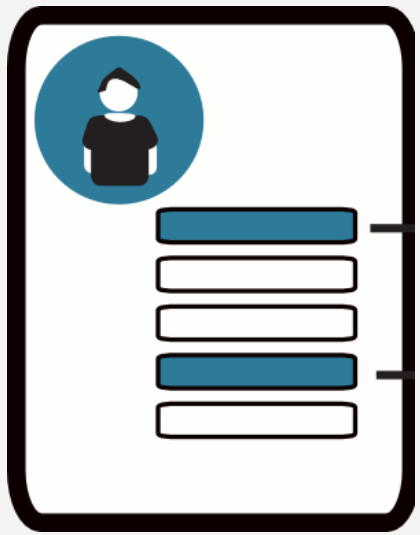

MATCHMAKING SERVICE

INDIVIDUALIZATION

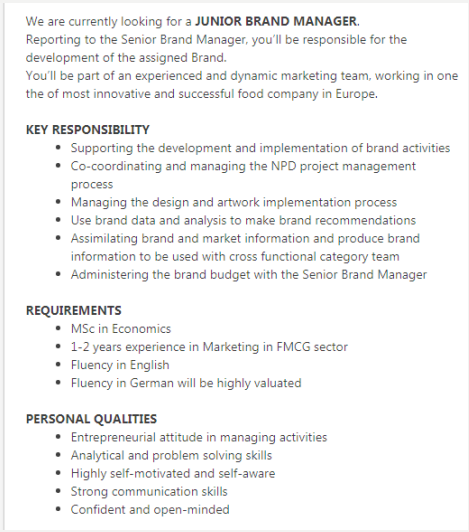

1) The platform would collect data about visitors and exhibitors;
2) An algorithm will provide users with the **matching percentages** between users profiles and job offers;
3) Once both parts will have «swiped right» each other, they will shown the match;
4) The candidate will have the highest priority in talking with the matched employers during the fair.

Visitors
1) Linkedin access (or manual);
2) Filtering function (by most important attributes)
3) CV upload
4) Orientation test (facultative)

Exhibitors
1) Indication of preferences about potential candidates
2) Data about the job position to be covered

We are currently looking for a **JUNIOR BRAND MANAGER**.
Reporting to the Senior Brand Manager, you'll be responsible for the development of the assigned Brand.
You'll be part of an experienced and dynamic marketing team, working in one the of most innovative and successful food company in Europe.

KEY RESPONSIBILITY
- Supporting the development and implementation of brand activities
- Co-coordinating and managing the NPD project management process
- Managing the design and artwork implementation process
- Use brand data and analysis to make brand recommendations
- Assimilating brand and market information and produce brand information to be used with cross functional category team
- Administering the brand budget with the Senior Brand Manager

REQUIREMENTS
- MSc in Economics
- 1-2 years experience in Marketing in FMCG sector
- Fluency in English
- Fluency in German will be highly valuated

PERSONAL QUALITIES
- Entrepreneurial attitude in managing activities
- Analytical and problem solving skills
- Highly self-motivated and self-aware
- Strong communication skills
- Confident and open-minded

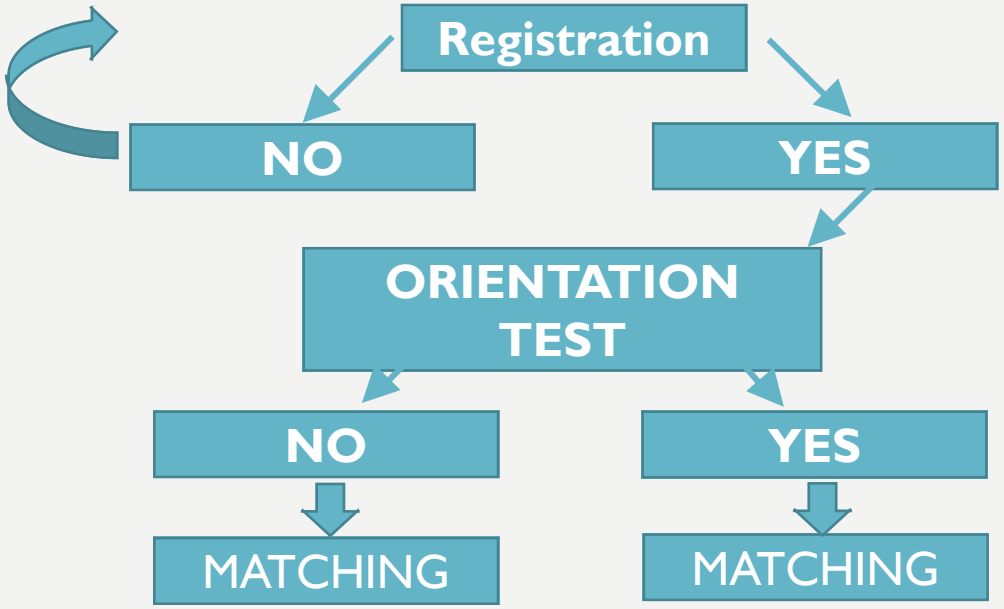

ORIENTATION TEST AND DIGITAL WAITING LIST

- After registration visitors have the possibility to make an **orientation test**, previously uploaded by recruiters
- Doing the test increases the matching percentage, by providing more info to the system,
- Depending on the matching percentage given by the algorithm, visitors **get priority** to schedule an appointment with recruiters

- Better matching between recuiters and visitors
- Higher efficiency
- Increased visitors satisfaction

INDIVIDUALIZATION

75% = 4°

80% = 3°

85% = 2°

97% = 1°

CUSTOMER JOURNEY : DURING THE EVENT

It's the D-day !
Bob **scans his ticket** to get access to the event and uses the **map function** to find the right exhibitors.

Priority access to meet exhibitors he matched with and scheduled an appointment.

Interview time.
All necessary information is already available to the recruiter thanks digital tools.

To wait and relax :
Social contest in partnership with other companies.
Theme : to improve happiness at the workplace.
Share your idea online with #kölnmesse.

SOCIAL CONTESTS AND LIVE POOLS

- Contests during the Job Fair in partnership with other companies

✓ To create a better **interaction between students and recruiters,** and improve **exhibitor's** and **organizer's brand image** and **visitor's experience.**

Example : « How to improve happiness at your workplace? »
Share the idea with the #KNMesseContest.. the most « liked »… win a price !

- Live polls *(Arsnova, Facebook)* are organised to get **direct feedbacks**
- Students are more involved in the event
- Live polls done directly through the application

INTERACTION & INTEGRATION

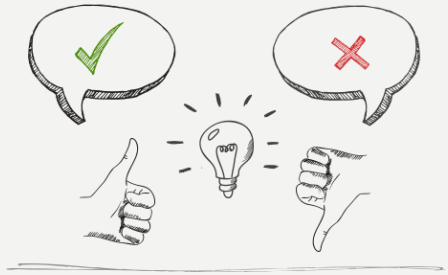

CUSTOMER JOURNEY : AFTER THE EVENT

Bob answers to the survey to share thought about the event.

Bob receives interesting information and news thanks to the **newsletter**.

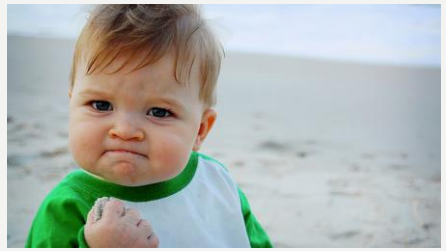

Bob gets interesting **individualized feedbacks** from recruiters he met (positive, negative how to improve).
Great news, he get the perfect job !

Caring about his life privacy, he decides to **delete his personal data**.

Bob is happy

FEEDBACKS BENEFITS

INDIVIDUALIZATION & INTEGRATION

- Feedbacks **shared directly through the app**
- Possibility for users to make **recommendations.**

- **From visitors to Job Fair:**

✓ Enhanced **visitors' integration**

- **From recruiters to visitors:**

✓ Improvement of **soft skills**

✓ Visitors **less disappointed** in case of negative outcome

✓ Gain of self-confidence during interviews

✓ Enhanced employment brand

- **From recruiters to Job Fairs :**

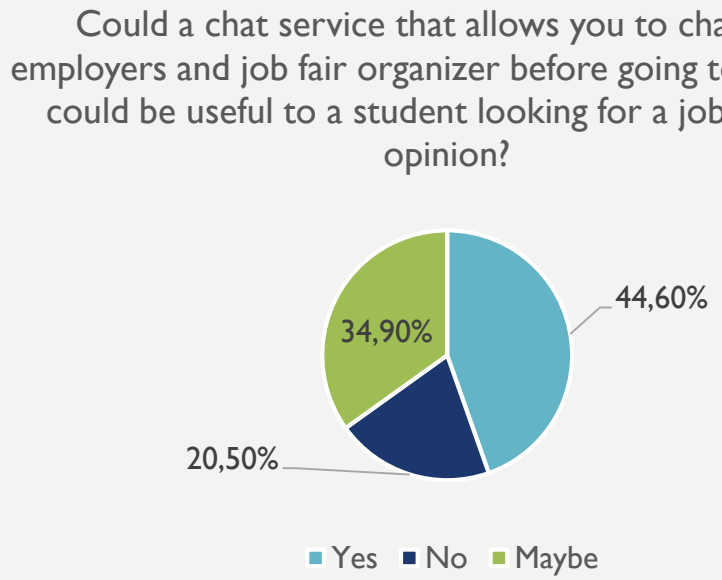

✓ Enhanced **recruiters' integration**

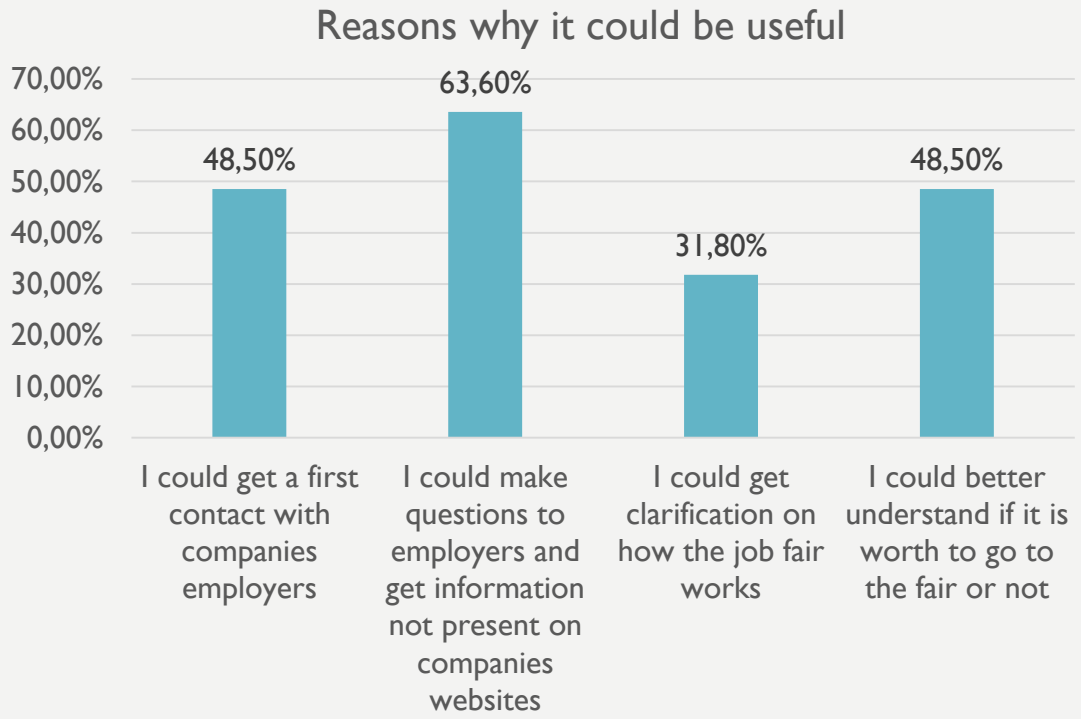

✓ **Improved matchings** between exhibitors and visitors

✓ **Account management** (enhanced relations with partner companies)

*CHAT SERVICE: WHAT DO PEOPLE THINK?

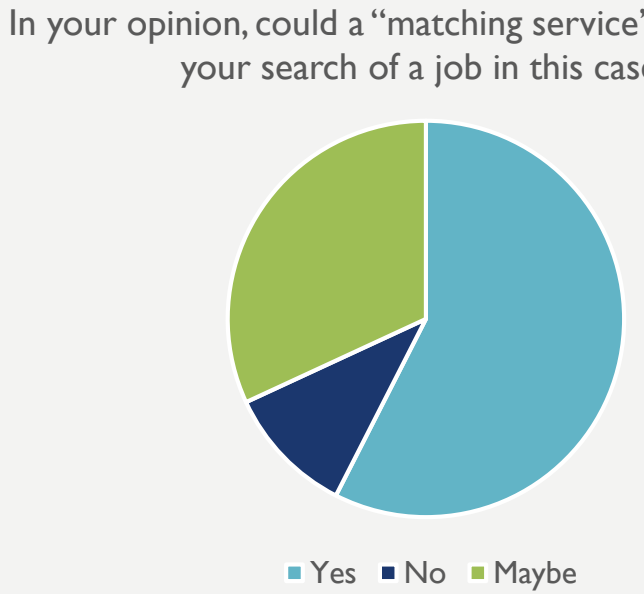

- The most part of our sample would appreciate this kind of service
- This chat service is particularly perceived as a way to **get a first contact** with companies and to **get info** that are not present on their websites
- It is also perceived as a «tool» useful to **understand if it is worth** to go or not to the event

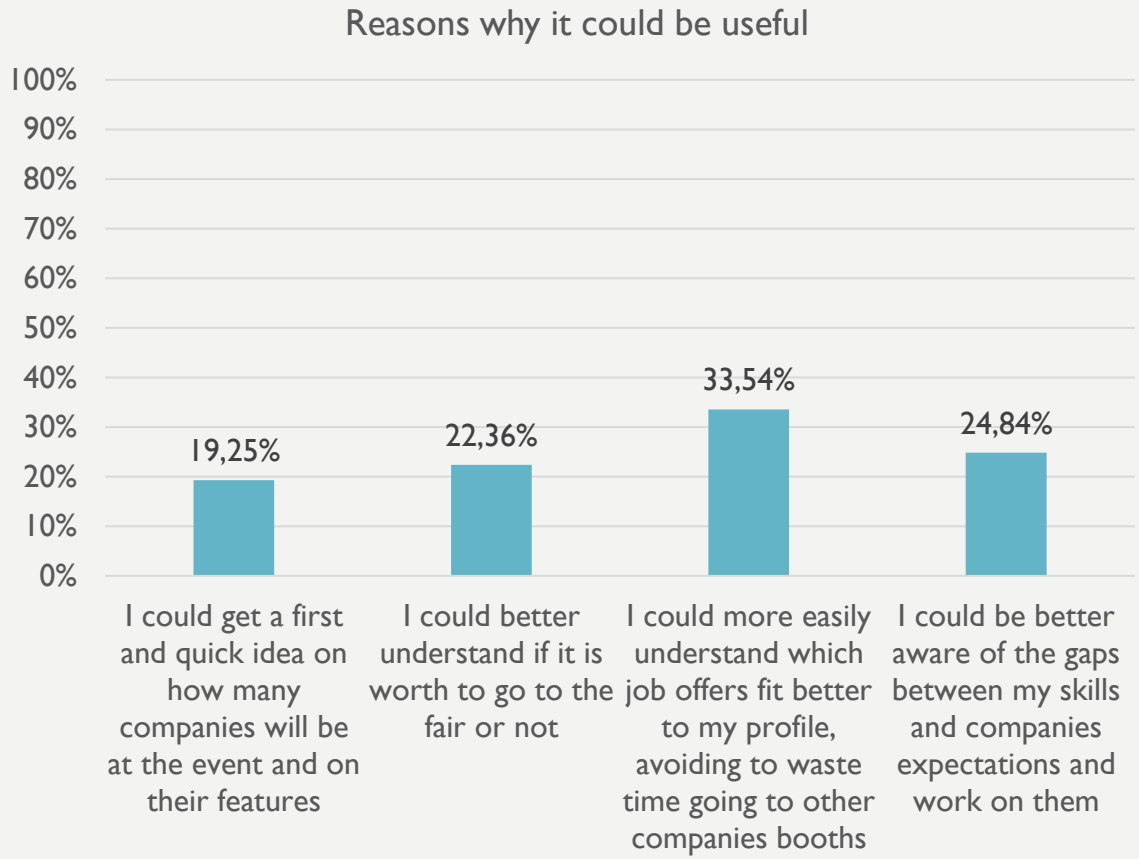

Online job portals usage		Chat service utility		
		Yes	No	Maybe
	Yes	25,6%	23,3%	51,2%
	No	48,6%	14,3%	37,1%

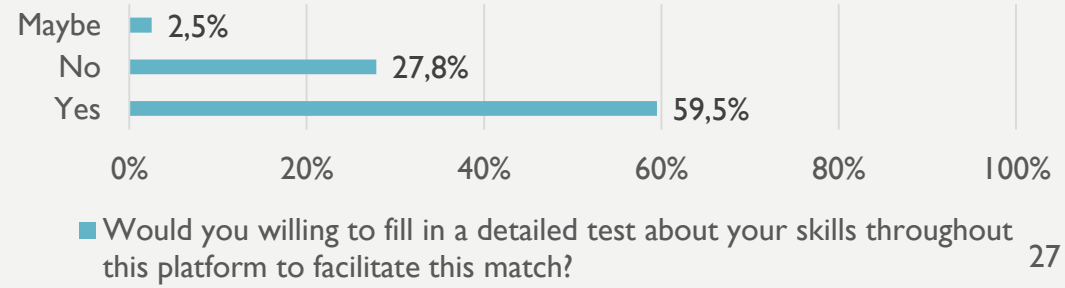

* See Appendix

*WHAT ABOUT MATCHING SERVICE?

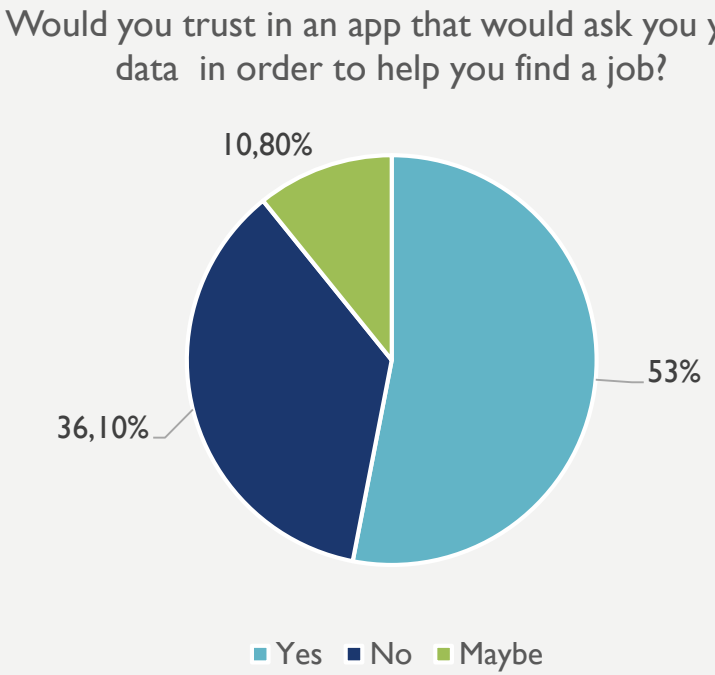

- The most part of our sample would appreciate this kind of service
- The matching service is perceived as a way to **understand** which companies **fit** with candidate's profiles, also avoiding to waste time
- It is also perceived as a useful «tool» to **improve any gap** with respect to companies expectations

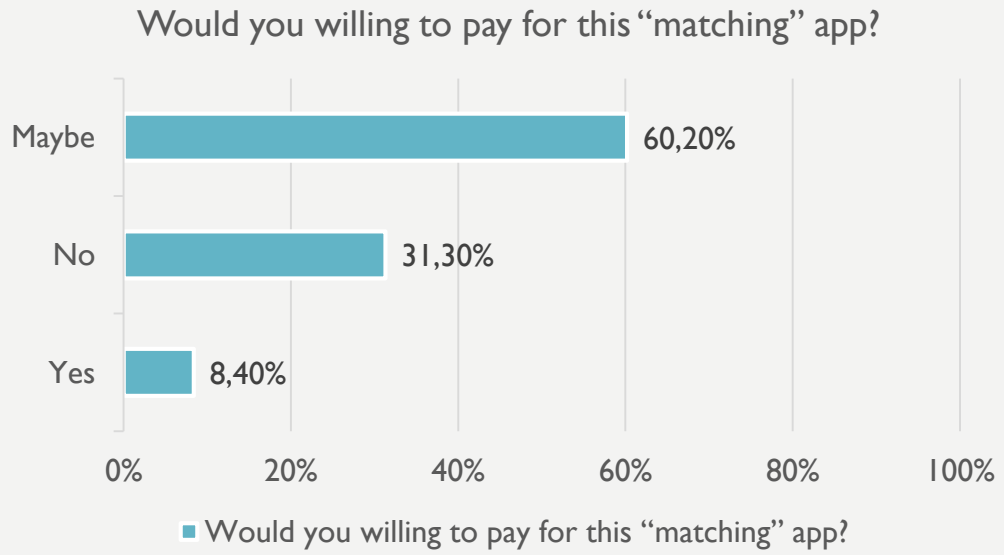

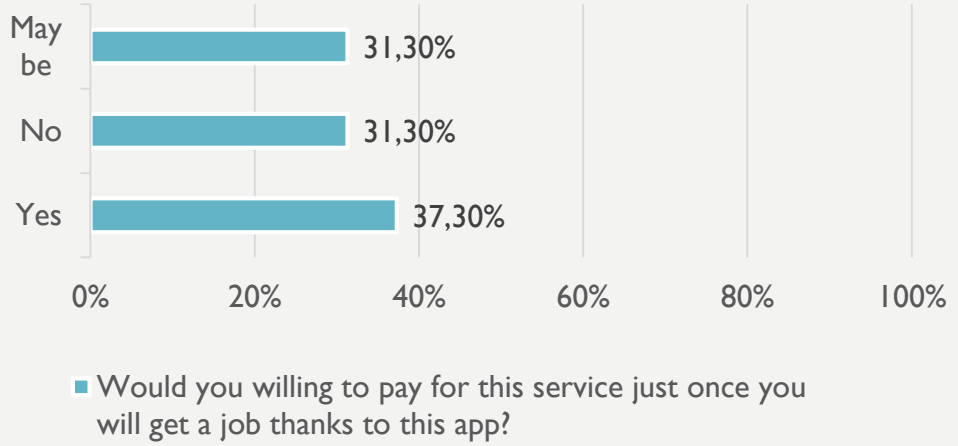

* See Appendix

*DO YOU TRUST US?

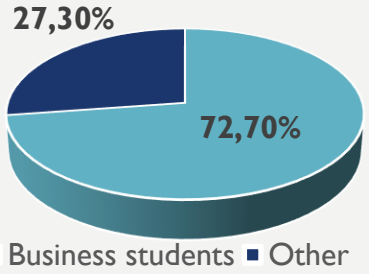

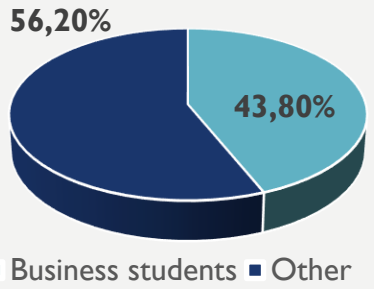

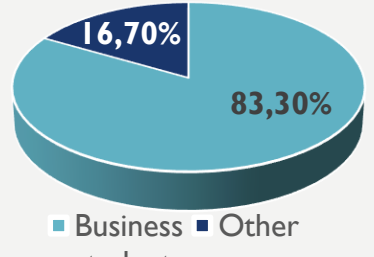

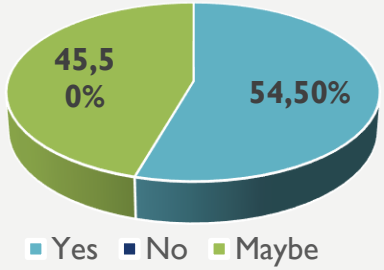

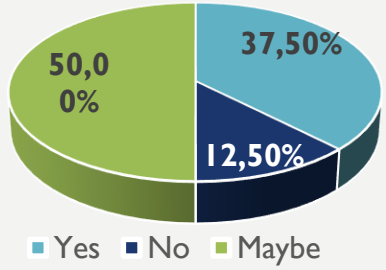

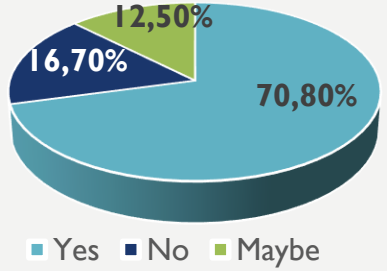

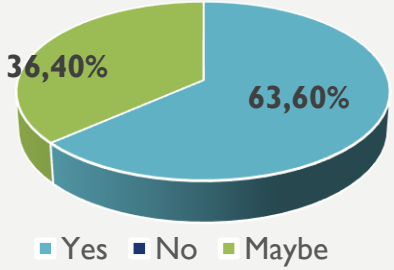

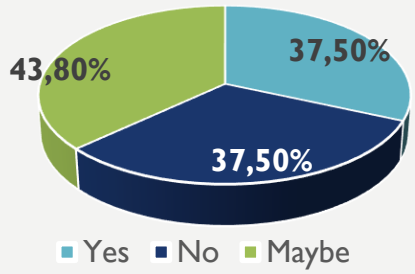

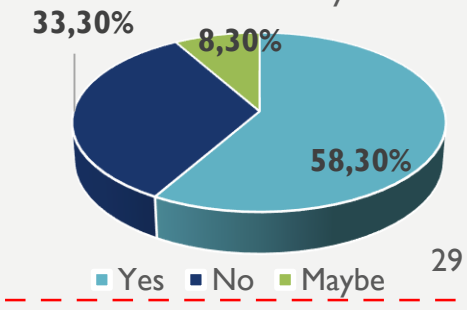

- The sample would **trust** our app
- They would not be willing to pay for it, but the percentage of favourable people increases in case they should pay once they get a job

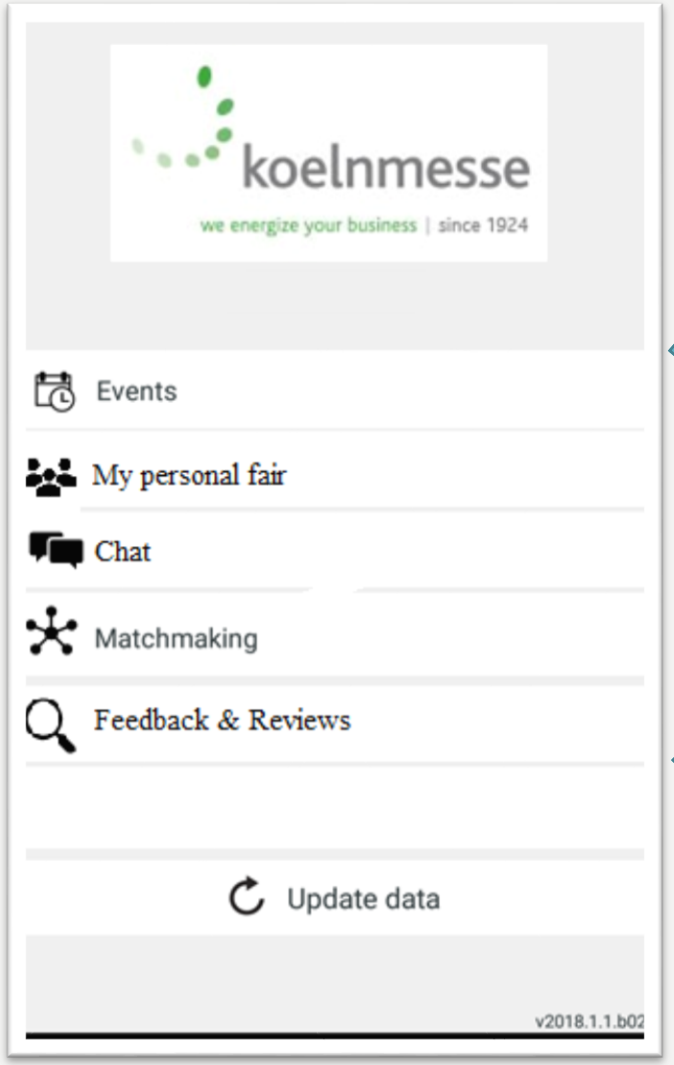

* See Appendix

*WHICH CLUSTER SHOULD WE TARGET?

	The Networkers (21,5%)	«I don't care» (31,4%)	The Involved (47%)
			
Field of study			
Matching function utility			
Willingness to pay after getting a job			

* See Appendix

KOELNMESSE APP

- Calendar of the next and last Koelnmesse events
- Information about exhibitors, included the available job offers that they offer during each event

- Personal data
- «Bring your ticket»
- Recorded matches
- Feedbacks from interviews

- Chat with employers and job fairs organizers
- Possibility to send questions to employers (by using the already existing layout)

- Matching service
- Orientation test

- Possibility to give feedbacks and personal reviews on attended fairs

PRIOR THE EVENT

5 I	
IDENTIFICATION	• Linkedin access • Orientation test
INDIVIDUALIZATION	• Matching function
INTERACTION	• Chat service
INTEGRATION	• **KoelnmesseBlog**
INTEGRITY	• **Encryption of data** • **Privacy notice at the first access**

- Better & personalized (pre)matching between exhibitors and visitors
- Decreased search costs
- Increased efficiency
- Deepened interaction between visitors and between visitors & exhibitors
- Improved consumer trust

DURING THE EVENT

5 I	
IDENTIFICATION	• **Map function** • ScanYourTicket • Social media usage
INDIVIDUALIZATION	• Digital waiting lists
INTERACTION	• Social contests in partnership with other companies
INTEGRATION	• Live pools as feedbacks
INTEGRITY	• **Privacy Pop-up messages** (Location Based Services)

- Increased efficiency
- Decreased queues at stands
- Improved visitor experience
- Deepened interaction
- Enhanced preference stability

AFTER THE EVENT

5 I	
IDENTIFICATION	• Recorded matches • Personal data stored in app system
INDIVIDUALIZATION	• Individualized feedbacks post-interviews
INTERACTION	• Chat service • **Membership & newsletters**
INTEGRATION	• Feedback and reviews system • Download material
INTEGRITY	• **Possibility for users to delete** their personal data every moment

- Increased customer satisfaction
- Improved exhibitors brand image
- Enhanced customer preference stability

COST PLAN

	iOS application (€)	Android application (€)	Total cost (€)
Backend	6.800		6.800
Development	34.000	36.720	70.720
Design	3.400	3.672	7.072
QA / Supervision	3.400	3.672	7.072
Advertising	40.000	43.200	83.200
Total cost	**87.600**	**94.064**	**181.664**

- The cost plan has been elaborated considering an approx. total amount of 1.400 working hours (development team externally hired) and an hourly rate of 34 € (Source: www.Thinkmobiles.com)
- We consider an approx. additional 6% cost for Android app development.
- Advertising costs have been estimated according to a research published by Fiksu DSP.

*ADVANTAGES, DISADVANTAGES AND CHALLENGES

- **Higher efficiency**
- **Less search costs** by providing customers with the most possible amount of information
- **Higher customer satisfaction**
- **Better match** between visitors and exhibitors expectations
- Reduction of informative gap between visitors and exhibitors
- Identify events that will act as triggers to execute campaigns with customized contents

- To build a necessary GDPR strategy
- Channel conflict between headhunters and platform
- Decrease of straight contact :

➡ **Good quality chat service to increase interaction**

- Overload of info for individuals that process data :

➡ **Easy-to-personalize approach**

- Instable consumer preferences

➡ **Reviews and feedbacks**

APPENDIX

QUESTIONS INTERVIEW MR NITSCH

KOELNMESSE

- Which is the price model of Koelnmesse?
- Must companies have to pay to have a stand during one of the Koelnmesse's job fair?
- Is it possible to held job interview during Koelnmesse job fairs?
- Have the fairs limited spot with regard to visitors and/or exhibitors? In that case, how does it work the registration process?

JOB FAIRS

- Which are the most important criteria that companies use to choose a potential candidate? (age, home area, studies, work experiences, languages, others?). And what about students?

- Which are the most important needs/motivations/reasons of a potential visitor which lead them to visit a job fair? What about the employers?
- On the other hand, Which are the most important challenges for a job fair organizer and what can discourage a potential visitor or exhibitor to take part to a job fair, today?
- How digitalization can help a job fair organizer to get over these problems?

DIGITALIZATION AND PERSONALIZATION IN JOB FAIRS

- How do you interact with companies and universities (communication, service,...)

- Do you know any technology that allows to make good matches between people? (in our case, students and employers) How does it work?

- What data is required to provide hyper-personalization services? How can this data can be collected?

- What kind of devices are needed to bring hyper-personalized services to life? What are the challenges involved in implementing these kinds of services?

APPENDIX

- Which instruments/tools & solutions were not successfull and why? Example: Matchmaking 365. Why did it fail?

- Which potential instruments/tools could be used for the future? (Key element of our project)

OUR IDEAS

- Our primitive idea is to create a digital platform that can make more efficient the match between people who are looking for a job and companies.
We are thinking about an orientation test to submit to potential candidates to let the platform "learn" data and better match them with job offers. What do you think? Should this test be mandatory for each partecipant to the job fair?
- Our important concern in our opinion is the need to interaction between candidates, job fair organizer and exhibitors. With regard to this, we are thinking to realize a chat service integrated in our platform where people could chat with employers representative and job fair organizer. Do you think that employers could accept this idea? Should we promise them an incentive?

- Do you think that people (students/employers) could be willing to pay a price for this matching service?

- What do you think about the possibility that students (or companies) could pay a price only once they get the job they applied for (or the candidate)? Could it be affordable?

APPENDIX

QUESTIONS LIST STUDENTS INTERVIEW

ICE BREAKING

- Salutations and brief explanation of the project (just about the fact that we are talking about a group project about digitalization, NOT MENTION job fair (in my opinion), it could influence the answers.. so avoid to mention it if you can)

- What do you study?

SOCIAL NETWORKS

- Do you use any social network? Which?
- Do you use Linkedin? If yes, how often? (every day, just some time per month…)
- When you use Linkedin, what do you use for?
- Are you used to also share posts or write status on Linkedin?
- Have you ever noticed sponsored ads on Linkedin? Have you ever clicked on them?
- Do you have any working experience?

JOB SEARCHING

- Which means do you usually use to look for a job? (Linkedin, job portals, job fairs…) (or internship, it's ok as well)
- Which are the factors that most stress you when you have to take a job interview?
- Which are the most important criteria that you use to choose among a potential job offer? (large or small company, pay, tasks, working time…)

i)

APPENDIX

JOB FAIR AND NEW APPROACHES

- What is for you a job fair? Could you explain us briefly?
- Have you ever been to a job fair? Which one?
- Which are the most important needs/motivations/reasons of a potential visitor which lead them to visit a job fair?
- Do you think that a job fair could be useful to a student who is looking for a job? How ?
- If you have been at least one time to a job fair, what do you like of them?
- And what do you not like?
- Do you think that the concept of job fair could be improved somehow? How do you improve a job fair?
- Do you know a job fair which applies a "digitalization approach"? (like: use of app, website, other services) What do you like of it?
- Do you know a job fair which applies a kind of "personalization approach"?
- Do you think that these approaches could be useful to improve the classical concept of job fair? How (in your opinion)?
- Imagine that you have decided to go to a job fair and you're looking for more information about the fair and possible job offers that companies present at that fair could offer. In your opinion, a chat service that allows you to chat with employers and job fair organizer before going to a job fair could be useful to you? How?

APPENDIX

- Our primitive idea is to create a digital platform that can make more efficient the match between people who are looking for a job and companies. In your opinion, could a "matching service" (like Tinder, just to give you an example) be useful to your search of a job? How?
- Would you willing to fill in a DETAILED test throughout an app that could facilitate this matching?
- Would you trust in an app that would ask you your data (such like gender, age, work experiences, school background, CV info etc.) in order to help you find a job? Or would you have some fears about your privacy?
- Would you willing to pay for this "matching" app? If yes, how much?
- Would you willing to pay for this service once you will get a job thanks to this app?
- Do you have any idea on how digitalization could help you to get over these stress factors?
- Have you ever received a feedback from a company after an interview? (both if you get or not get the job) How did you feel?

APPENDIX

QUESTIONS LIST EMPLOYERS INTERVIEW

ICE BREAKING

- Salutations and brief explanation of the project (just about the fact that we are talking about a group project about digitalization, NOT MENTION job fair (in my opinion), it could influence the answers.. so avoid to mention it if you can)

- What is your job position?

SOCIAL NETWORKS

- Do you use any social network? Which?
- Do you use Linkedin? If yes, how often? (every day, just some time per month…)
- When you use Linkedin, what do you use for?
- Are you used to also share posts or write status on Linkedin?
- Have you ever noticed sponsored ads on Linkedin? Have you ever clicked on them?
- Have you ever used Linkedin to find potential candidates for an available job position in your company?

CANDIDATE SEARCHING

- Which means do you usually use to look for a potential candidate for an available job position in your company? (Linkedin, job portals, job fairs…) (or internship, it's ok as well)
- Which are the most important criteria that you use to choose among a potential job offer? (large or small company, pay, tasks, working time…)

APPENDIX

JOB FAIR AND NEW APPROACHES

- What is for you a job fair? Could you explain us briefly?
- Have you ever been to a job fair? Which one?
- Which are the most important needs/motivations/reasons of a potential EXHIBITOR which lead them to visit a job fair?
- Do you think that a job fair could be useful to a company who is looking for a job? How ?
- If you have been at least one time to a job fair, what do you like of them?
- And what do you not like?
- Do you think that the concept of job fair could be improved somehow? How do you improve a job fair?
- Do you know a job fair which applies a "digitalization approach"? (like: use of app, website, other services) What do you like of it?
- Do you know a job fair which applies a kind of "personalization approach"?
- Do you think that these approaches could be useful to improve the classical concept of job fair? How (in your opinion)?
- Imagine that you have decided to go to a job fair and a candidate is looking for more information about the fair and possible job offers that companies present at that fair could offer. Would you willing to spend some time in chatting with a candidate looking for this information?

APPENDIX

- Our primitive idea is to create a digital platform that can make more efficient the match between people who are looking for a job and companies. In your opinion, could a "matching service" (like Tinder, just to give you an example) be useful to your search of a candidate? How?
- Would you willing to prepare questions and answers for a DETAILED test that candidates could do throughout an app that could facilitate this matching?
- Would you trust in an app that would ask you the data about the available positions in your company (such like requested work experiences and skills, school background, pay, etc.) in order to help you find a job? Or would you have some fears about privacy?
- Would your company be willing to pay for this "matching" app? If yes, how much?
- Would your company be willing to pay for this service once you will get a perfect candidate thanks to this app?
- Have you ever given a feedback to a candidate after an interview? (both if you get or not get the job) How do you think this practice could improve your company image?

APPENDIX

1) In which of these social networks do you have an account?
   - Facebook
   - Instagram
   - Snapchat
   - Linkedin
   - Twitter
   - Others: _____
   - I don't use any social network
2) Are you used to use a music streaming service?
   - Yes
   - No
3) Which of these music streaming service do you mostly use?
   - Spotify
   - Youtube
   - Deezer
   - Apple Music
   - Tidal
   - Amazon Music
   - Google Play Music
   - Other
4) Do you own a premium account on this platform?
   - Yes
   - No
5) Do you own a Linkedin account?
   - Yes
   - No

APPENDIX

6) How often do you use Linkedin?
   - Less than once a month
   - From once to three times a month
   - From once to three times a week
   - Every day

7) When you use Linkedin, what do you use it for mostly? (Please indicate in a range from 1 (to 9 what do you use it for mostly)
   - To chat with my contacts
   - To read my news feed
   - To share interesting posts
   - To like interesting contents
   - To comment interesting posts
   - To write my own status
   - To check new interesting job offers
   - To apply for an available job position
   - To visit my contacts profiles

APPENDIX

8) Have you ever noticed sponsored ads on Linkedin?
   YES/NO

9) Have you ever clicked on them? YES/NO/DON'T KNOW
10) Which means do you usually use to look for a job or an internship?
    - My personal network (colleagues, friends, teachers who suggest me available job offers)
    - My university network (job portals held by my Uni etc.)
    - Linkedin
    - Online job portals
    - Companies websites
    - Job Fairs
    - Job search apps
    - Others: _____

APPENDIX

12) Which are the criteria that you use to choose among a potential job offer? Please indicate their importance in a range from 1 (less important) to 9 (really important)

- Salary
- Company's size (small vs. large company)
- Corporate image
- Fit between your skills and job offer
- Tasks to be performed
- Contract type
- Location
- Corporate environment (relationship with colleagues etc.)
- Working time

13) Have you ever received a feedback from a company after a FAILED job interview that you took?

YES/NO

APPENDIX

IF: YES

9a) How do you think it was helpful to you? (You can select more than one option)

- It helped me to better accept the failure
- It helped me to improve my skills
- It improved my perception of the corporate and employer image
- It helped me to understand what was wrong during the interview
- It was useless for me
- I felt worse after receiving it
- Other: _____

14) Do you know what is a "Job Fair"? YES/NO/I DON'T KNOW

IF NO: 10a) A **job fair** is an event in which employers, recruiters, and schools give information to potential employees.

15) Have you ever been to a Job Fair? YES/NO/I DON'T KNOW

IF YES

APPENDIX

15) Have you ever been to a Job Fair? YES/NO/I DON'T KNOW

IF YES

11a)How much these factors are important for you in choosing to go to a Job Fair? (Please indicate it in a range from 1 to 9)

- Low price or free entry
- Number of the partecipating companies
- Size of the partecipating companies
- Waiting time at booths
- Presence of "presentation sessions" in which companies present available job position
- Presence of rest shops nearby the fair
- Chance to take interviews during the fair
- "Face-to-face" contact with employers
- Chance to get information which are not on companies websites
- Chance to take simulated job interviews
- Chance to interact with employers before and after the event
- Availability of employers to provide with information
- Chance to get new professional contacts
- Chance to know companies I didn't know before the fair

11b) How much the following factors had an influence on the fact that you have never been to a job fair? (1-9)

- Entry price too high

APPENDIX

11b) How much the following factors had an influence on the fact that you have never been to a job fair? (1-9)

- Entry price too high
- Lack of time
- Location hard to be reached
- There are too less participating companies
- There are too little participating companies
- They are too crowded
- No rent shops nearby the fair
- No chance to take job interview during the event
- No chance to take simulated interview
- There are no real chance to get a job
- I think that employers would not be available to give me information
- No chance to get new professional contents
- No chance to know new companies

APPENDIX

16) Do you think that a job fair could be useful to a student who is looking for a job? YES/NO/I DON'T KNOW

12b) For which of the following reasons?

- I could become aware of interesting job offers
- I could have the chance to know companies I didn't know before and get new professional contacts
- I could have a "face-to-face" feeling about a company I am interested to
- I could get new information about a company I really like
- I could get some feedback about my CV
- I could better understand which job offers fit more with my profile
- I could train my self-presentation skills talking with different employers
- I could get a first feeling about the job market and the most required job positions
- Other : _____

17) Imagine that you have decided to go to a job fair and you're looking for more information about the fair and possible job offers that companies present at that fair could offer. In your opinion, a chat service that allows you to chat with employers and job fair organizer before going to a job fair could be useful to a student looking for a job? YES/NO/I DON'T KNOW

14a)For which of the following reasons do you think it could be useful to a student looking for a job?

- I could get a first contact with companies employers
- I could make question to employers and get information not present on companies websites
- I could get clarification on how the job fair works
- I could better understand if it is worth to go to the fair or not
- Other: _____

APPENDIX

14b) For which of the following reasons do you think it could be useless to a student looking for a job?

- There will be risks of misunderstanding between during the communication
- I wouldn't trust in communicating via chat my personal information through an app that I don't know
- Other: _____

15) Our primitive idea is to create a digital platform that can make more efficient the match between people who are looking for a job and companies before the job fair, as a preliminary contact step between visitors and exhibitors . In your opinion, could a "matching service" (like Tinder, just to give you an example) be useful to your search of a job in this case? YES/NO /I DON'T KNOW

APPENDIX

16) Would you willing to fill in a detailed test about your skills throughout this platform to facilitate this match? YES/NO/I DON'T KNOW

15a) For which of the following reasons do you think this "matching service" could be useful to a student looking for a job?

- I could get a first and quick idea on how many companies will be at the event and on their features
- I could better understand if it is worth to go to the fair or not
- I could better more easily which job offers fit better to my profile, avoiding to waste time going to other companies booths
- I could be better aware of the gaps between my skills and companies expectations and work on them
- Other: _____

15b) For which of the following reasons do you think this "matching service" could be useless to a student looking for a job?

- It would be a waste of time
- I think that a "match" between a potential candidate and employers depends more on other factors (factors not measurable through an algorithm, such as self-presenting skills etc.)
- Other users could easily cheat during the orientation test and thus the match could be distorted
- Other: _____

APPENDIX

17) Would you trust in an app that would ask you your data (such like gender, age, work experiences, school background, CV info etc.) in order to help you find a job? YES/NO/I DON'T KNOW

18) Would you willing to pay for this "matching" app? YES/NO/I DON'T KNOW

19) If yes, how much would you pay? _____

20) Would you willing to pay for this service once you will get a job thanks to this app? YES/NO/I DON'T KNOW

21) Gender
- Male
- Female

APPENDIX

22) Home Country: _____

23) Field of study

- Economics
- Marketing
- Finance
- HR
- Management/Business Administration
- Law
- Sciences
- Engineering
- Mathematics
- Medicine
- Human Sciences
- Humanities
- Languages
- Other: _____

24) Work experience (Internships are valid as well)

- Less than 3 months
- Between 3 and 6 months
- Between 6 months and 1 year
- Between 1 year and 2 years
- More than 2 years

APPENDIX – FACTOR ANALYSIS

11a)How much these factors are important for you in choosing to go to a Job Fair? (Please indicate it in a range from 1 to 9)

- Low price or free entry
- Number of the partecipating companies
- Size of the partecipating companies
- Waiting time at booths
- Presence of "presentation sessions" in which companies present available job position
- Presence of rest shops nearby the fair
- Chance to take interviews during the fair
- "Face-to-face" contact with employers
- Chance to get information which are not on companies websites
- Chance to take simulated job interviews
- Chance to interact with employers before and after the event
- Availability of employers to provide with information
- Chance to get new professional contacts
- Chance to know companies I didn't know before the fair

11b) How much the following factors had an influence on the fact that you have never been to a job fair? (1-9)

- Entry price too high

APPENDIX

Final Cluster Centers

	Cluster		
	1	2	3
REGR factor score 1 for analysis 1	,11505	-,66304	,38930
REGR factor score 2 for analysis 1	,25983	-,69047	,34123
REGR factor score 3 for analysis 1	,24214	-,69028	,34920
REGR factor score 4 for analysis 1	-1,46238	,16348	,56127

ANOVA

	Cluster		Error		F	Sig.
	Mean Square	df	Mean Square	df		
REGR factor score 1 for analysis 1	5,408	2	,816	48	6,625	,003
REGR factor score 2 for analysis 1	5,583	2	,809	48	6,900	,002
REGR factor score 3 for analysis 1	5,598	2	,808	48	6,924	,002
REGR factor score 4 for analysis 1	15,756	2	,385	48	40,908	,000

The F tests should be used only for descriptive purposes because the clusters have been chosen to maximize the differences among cases in different clusters. The observed significance levels are not corrected for this and thus cannot be interpreted as tests of the hypothesis that the cluster means are equal.
